Practical 1

PRACTICALS

Dismantling and assembling of steam iron box

AIM

1. To dismantle and assemble the steam iron box.
2. To know the parts of the appliance.
3. To learn about various defaults and remedial measures.

Additional information

An iron box is the household appliance and commonly used by all people. From child to elders, all are not wearing the dress without ironing. This appliance plays a vital role in the modern world.

Electric Iron box is classified into three types.

a. Simple or ordinary iron box
b. Automatic iron box
c. Steam iron box.

a. Simple or ordinary iron box

Now a days an ordinary iron box is not used.

b. Automatic iron box

1. Parts Description:

i) Sole plate

The sole plate is the base plate of the iron box, which is in the bottom side and is laminated with nickel or chromium to make the surface shining. There are two threaded holes at the top of the sole plate, in which heating element and pressure plate are kept and got fitted with top cover of the iron box.

ii) Heating element

The heating element is made up of Nichrome, the metal alloy which is completely wound inside the mica sheet.

iii) Pressure plate

The pressure plate is made up of a cast iron plate of the shape of heating element. Its size is slightly larger than the heating element. It keeps the heating element in a compact and stationary, when the iron box is in motion.

iv) Top cover

It is made up of a sheet cover used to cover heating element and pressure
