## Tabulation

| S.No. | Voltmeter reading (V) | Ammeter reading (I) | Time in minutes | Energy consumed in kWh |
|---|---|---|---|---|
| | | | | |
| | | | | |
| | | | | |

## Calculation

Energy meter constant = (V x I x cos ϕ x t)/ (60 x 1000) kWh

Assume cos ϕ = 1

## Result

Thus the energy consumed by the given electrical equipment =-----kWh.
