Chapter 3

Electric heating appliances

VTNV8Y

Be the change that you want to see in the world.

Mahatma Gandhi

Learning Objectives

Electric heating is a process in which electrical energy is converted into heat energy. It is essential for the students to know, how the electrical energy is being utilized in heating appliances. The main objective of this chapter is to make students, to understand the working of various heating appliances through the types of conductive methods.

Furthermore, this lesson also aims to aid the students, to gain practical experience about defects, their reasons and its corrective measures of the heating appliances.
