windows of the rooms do not face each other. If necessary, curtains could be utilized to create privacy.

- Privacy of entire house from street.

Trees or creepers can be grown in front of the house so that privacy can be obtained for the house from the street.

iv. Grouping of rooms

Based on the routine works that are performed in a house, the rooms shall be arranged adjacent to each other.

To simplify the utility of the family members, dining hall should be placed adjacent to the kitchen, living room adjacent to the verandah, bathroom and water closet should be constructed adjacent to the bedroom.

v. Roominess

A house should be planned and constructed in such a way that the interior of the house is magnified to the maximum extent possible. The available area should be well planned so that, not even a small bit of area is left unutilized. Shelves could be constructed in the walls and lofts could be constructed beneath the roof to store articles. By this way the carpet area of the house could be maximized. The space available beneath the staircase could be covered and also utilized for storing articles. The size and shape of the room, the number and arrangements of furniture, interior wall colour also helps to maximize the carpet area of the room.

vi. Circulation

The path leading from one room to another should be simple, straight and short. It is better to provide separate entrance for every room or the entrance for individual rooms could be from a common passage. None of the rooms should have their entrance positioned in another room which will lead to inconvenience to the inmates.

Proper positioning of rooms and proper arrangement of furniture like sofa, tables and chairs towards the corner of the walls will facilitate uninterrupted walking space inside a house.

vii. Flexibility

The utility of a room should not only be for a particular purpose. Instead, it should be flexible enough to adopt various other utilities according to the need. It will solve the space problem. For example if the living room is constructed bigger in size, a portion of it could be utilized for dining and also could be utilized for sleeping during night times. Utilizing the kitchen for dining purpose, utilizing the verandah adjacent to kitchen as play area for small kids will solve space problems to a certain extent.

Curtains, folding screens, almirahs, plywood boards, etc., could be used to partition the common area for various activities.

viii. Sanitation

A house should always be constructed with good ventilation, proper lighting and sanitation facilities. Proper planning should be done to drain waste water from kitchen, bathroom and water closet in a hygienic way.

ix. Placement of furniture

A room in a house should be planned and constructed in such a way keeping in mind the furniture that are to be placed in it. The position of sofa sets, tables and chairs and their sizes should be so fixed initially keeping in view
