Activity 2

Collect the pictures of different types of pumps and prepare an album.

7.6.8 Comparison between Centrifugal Pump and Reciprocating Pump

Centrifugal pumps	Reciprocating Pumps
1. The discharge is continuous and smooth	1. The discharge is fluctuating and pulsating
2. It can handle large quantity of liquid	2. Handles small quantity of liquid
3. It is used for large discharge through small heads	3. It is meant for small discharge at high heads
4. Cost of centrifugal pump is less as compared to reciprocating pump	4. Cost of reciprocating pump is approximately four times the centrifugal pump.
5. Runs at high speed	5. Runs at low speed
6. Efficiency is high	6. Efficiency is low
7. Needs smaller area and cost of installation is less	7. Needs large area and installation cost is high
8. Low maintenance cost	8. High maintenance cost
9. It can also be used for lifting highly viscous liquids	9. Used only for lifting pure water or less viscous liquids
