Table of Contents

2.1 Introduction

2.2 Cement Concrete Composites

2.2.1 Light Weight Concrete (LWC)

2.2.2 Autoclaved Aerated Concrete (AAC)

2.2.3 Fibre Reinforced Concrete (FRC)

2.2.4 Self Compacting Concrete (SCC)

2.2.5 Ferrocement

2.3 Glass

2.3.1 Properties of Glass

2.3.2 Uses of Glass as building material

2.3.3 Special Glasses

2.4 Rubber

2.4.1 Uses of Rubber as building Material

2.5 Unplasticized Polyvinyl Chloride (UPVC)

2.5.1 Advantages of UPVC

2.6 Aluminium

2.6.1 Properties of Aluminium

2.6.2 Uses of Aluminium as building material

2.7 Steel

2.7.1 Types of Steel Reinforcement

2.7.2 Rolled sections – Structural Steel

2.7.3 Stainless Steel

2.8 Miscellaneous materials

2.8.1 Admixtures in Concrete

2.8.2 Damp proofing materials

2.8.3 Fly Ash

2.8.4 Plaster of Paris

2.8.5 Sound Insulating Materials

2.8.6 Electrical Insulating Materials

Learning Objectives

At the end of this lesson you shall be able to

- Understand various types of cement concrete composites and its advantages.
- Explain the properties, advantages and uses of various special building materials.
- List the miscellaneous materials used in building construction.
- Explain properties, types and advantages of miscellaneous materials.
