World largest Lake

Wular Lake, located in the state of Jammu and Kashmir, is often referred to as the largest **freshwater lake** in India. Wular is a natural lake that is a major part of the Jhelum River basin.

The Sambhar **Salt Lake**, **India's largest** inland **salt lake**, is located 96 km southwest of the city of Jaipur (Northwest **India**) and 64 km northeast of Ajmer along National Highway 8 in Rajasthan. it surrounds the historical Sambhar **Lake** Town.

4.3.1 Impurities in water and its classification

Impurities in water may be classified as below

a. Physical Impurities
b. Chemical Impurities
c. Bacteriological Impurities

a. Physical Impurities

They are due to the presence of inorganic substances like clay, pebbles, sand, silt, algae, fungi, bacteria, etc., in water in finely divided condition. Physical impurities give taste, odour, colour and turbidity to water.

b. Chemical Impurities

They may be either organic or inorganic and is present in either suspended or dissolved form. The suspended organic chemical impurities are due to the presence of vegetables or animals in water. The dissolved inorganic chemical impurities are caused by the melting of minerals and gases in water.

c. Bacteriological Impurities

The Bacteriological Impurities are caused in water by the presence of bacteria. The bacterias may be harmful or harmless. Harmless bacterias are called non-pathogens. Pathogens are dangerous and are mainly responsible for water borne diseases.

4.3.2 Test on Water

The Analysis of water is carried out in order to establish its quality. Following

Tests	Properties/ Impurities
1. Physical tests	i. Turbidity ii. Colour iii. Taste iv. Odour
2. Chemical tests	i. Total solids ii. Hardness iii. PH value iv. Chloride v. Residual chlorine vi. Iron and Manganese
3. Bacteriological tests	i. Total count test ii. E-coli test
