```
Item Name, Cost-Rs, Quantity, Profit
Keyboard, 480, 12, 1152
Monitor, 5200, 10, 10400
Mouse, 200, 50, 2000
„Total Profit =,13552
```

13.5.1 Microsoft Excel to open a CSV file

If Microsoft Excel has been installed on the computer, **by default CSV files should open automatically in Excel when the file is double-clicked.** If you are getting an **Open With** prompt when opening the CSV file, choose Microsoft Excel from the available programs to open the file.

Alternatively, you can open Microsoft Excel and in the menu bar, select **File → Open,** and select the CSV file. If the file is not listed, make sure to change the file type to be opened to Text Files (*.prn, *.txt, *.csv).

If both MS Excel and Open Office calc is installed in the computer, by default the CSV file will be opened in MS Excel.

13.6 Read and write a CSV file Using Python

Python provides a module named **CSV,** using this you can do several operations on the CSV files. The CSV library contains objects and other code to **read, write, and process** data from and to CSV files.

CSV files have been used extensively in e-commerce applications because they are considered very easy to process.

13.6.1 Read a CSV File Using Python

There are two ways to read a CSV file.

1. Use the csv module's reader function
2. Use the DictReader class.
