(3) In the **Save As** dialog box, select the location where you want to save your Python code, and type the file name in **File Name** box. Python files are by default saved with extension **.py.** Thus, while creating Python scripts using Python Script editor, no need to specify the file extension.

(4) Finally, click **Save** button to save your Python script.

(iii) Executing Python Script

(1) Choose **Run** → **Run Module** or Press **F5**

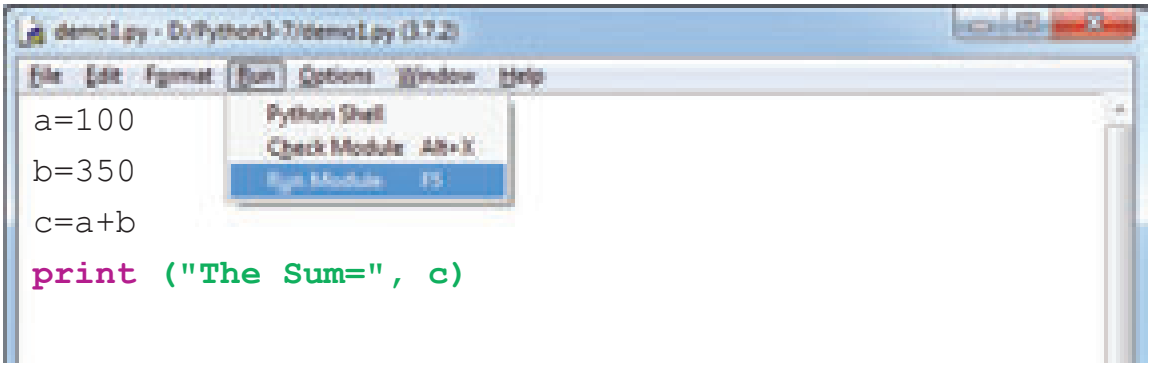

Figure 5.7 – To Execute Python Script

(2) If your code has any error, it will be shown in red color in the IDLE window, and Python describes the type of error occurred. To correct the errors, go back to Script editor, make corrections, save the file using **Ctrl + S** or **File** → **Save** and execute it again.

(3) For all error free code, the output will appear in the IDLE window of Python as shown in **Figure 5.8**
