Effects of Noise Pollution

a. **Hearing Loss**: Chronic exposure to noise may cause noise-induced hearing loss. Older people are exposed to significant occupational noise and thereby reduced hearing sensitivity.

b. **Damage Physiological and Psychological health**: Unwanted noise can damage physiological and psychological health. For example, annoyance and aggression, hypertension, and high stress levels.

c. **Cardiovascular effects**: High noise levels can contribute to cardiovascular problems and exposure to blood pressure.

d. **Detrimental effect on animals and aquatic life**: Noise can have a detrimental effect on animals, increasing the risk of death.

e. **Effects on wildlife and aquatic animals**: It creates hormone imbalance, chronic stress, panic and escape behavior and injury.

Remedial measures to control Noise Pollution

1. Use of noise barriers
2. Newer roadway for surface transport
3. Traffic control
4. Regulating times for heavy vehicles
5. Installations of noise barriers in the work place
6. Regulation of Loudspeakers

10.7.4 Land Pollution

Definition

The land pollution is defined as, "the degradation of land because of the disposal of waste on the land". Any substance (solid, liquid or gaseous) that is discharged, emitted or deposited in the environment in such a way that it alters the environment causes land pollution

-Protection of the Environment Operations Act 1997

Types of Land Pollution

i. **Solid waste**: It includes all kinds of rubbish like paper, plastic containers, bottles, cans, food, used cars, broken electronic goods, municipal waste and hospital waste.

ii. **Pesticides and Fertilizers**: Many farming activities engage in the application of fertilizers, pesticides and insecticides for higher crop yield which pollute land.

iii. **Deforestation**: Humans depend on trees for many things including life. Trees absorb carbon dioxide from the air and release Oxygen, which is needed for life. Forest helps replenish
