```
            </li>
          </ul>
        </td>
      </tr>
    <% end %>
  </tbody>
</table>
</div>
```

This template uses a number of built-in Rails features:

- The rows in the listing have alternating background colors. The Rails helper method called `cycle` does this by setting the CSS class of each row to either `bg-green-50` or `bg-white`, automatically toggling between the two style names on successive lines.

- The `truncate` helper is used to display the first eighty characters of the description. But before we call `truncate`, we call `strip_tags` to remove the HTML tags from the description.

- The `number_to_currency` helper is used to format the price. We'll explore this more in *Iteration C3: Using a Helper to Format the Price*.

- The `image_tag` helper is used to display the image. We provide `product.image.url` as the link to the image file, as described in *Active Storage*.

- Look at the `link_to 'Destroy'` line. See how it has the parameter `data: { turbo_confirm: 'Are you sure?' }`. If you click this link, Rails arranges for your browser to pop up a dialog box asking for confirmation before following the link and deleting the product. (Also, see the sidebar for an inside scoop on this action.)

As far as styling goes:

- We left the notice alone.
