```
            <%= sanitize(product.description) %>
          </p>

          <div class="mt-3">
            <%= product.price %>
          </div>
        </div>
      </li>
    <% end %>
  </ul>
  </div>
```

Note the use of the `sanitize` method for the description. This allows us to safely[47] add HTML stylings to make the descriptions more interesting for our customers.

We also used the `image_tag` helper method. This generates an HTML `<img>` tag using its argument as the image source. We'll need to place this image in the `app/assets/images` directory. You've already downloaded it, so you can copy it there now.

```
depot> cp db/images/logo.svg app/assets/images/
```

A page refresh brings up the display shown in the following screenshot. It's still pretty basic, and it seems to be missing something. The customer happens to be walking by as we ponder this, and she points out that she'd also like to see a decent-looking banner and sidebar on public-facing pages.
