Confident that the code works as intended, we try the Add to Cart buttons in our browser. And the following screenshot shows what we see.

This is a bit underwhelming. We have scaffolding for the cart, but when we created it we didn't provide any attributes, so the view doesn't have anything to show. For now, let's add a trivial template that shows the title of each book in the cart. Update the file views/carts/_cart.html.erb like so:

rails80/depot_f/app/views/carts/_cart.html.erb

```
   <div id="<%= dom_id cart %>">
»    <h2 class="font-bold text-lg mb-3">Your Pragmatic Cart</h2>
»
»    <ul class="list-disc list-inside">
»      <% cart.line_items.each do |item| %>
»        <li><%= item.product.title %></li>
»      <% end %>
»    </ul>
   </div>
```

You may be wondering about the underscore in the file name and where the cart variable comes from. Don't worry, we'll cover all this and more when we get to *Partial Templates*, but for now it's enough to know that this is the file that Rails uses to render a single cart.

So, with everything plumbed together, let's go back and click the Add to Cart button again and see our view displayed, as in the following screenshot.
