```
          quantity: 1
        )
      end

      # remove original item
      line_item.destroy
    end
  end
```

Now, we can just as easily roll back our migration with a single command:

```
depot> bin/rails db:rollback
```

Rails provides a Rake task to allow you to check the status of your migrations:

```
depot> bin/rails db:migrate:status
database: storage/development.sqlite3

 Status   Migration ID    Migration Name
--------------------------------------------------
   up     20160407000001  Create products
   up     20160407000002  Create carts
   up     20160407000003  Create line items
   up     20160407000004  Add quantity to line items
 down     20160407000005  Combine items in cart
```

Now, we can modify and reapply the migration or even delete it entirely. To inspect the results of the rollback, we have to move the migration file out of the way so Rails doesn't think it should apply it. You can do that via `mv`, for example. If you do that, the cart should look like the following screenshot:
