```
»       </tfoot>
»     </table>

      <%= button_to 'Empty Cart', cart, method: :delete,
        class: 'ml-4 rounded-lg py-1 px-2 text-white bg-green-600' %>
    </div>
```

To make this work, we need to add a method to both the `LineItem` and `Cart` models that returns the total price for the individual line item and entire cart, respectively. Here is the line item, which involves only simple multiplication:

rails80/depot_i/app/models/line_item.rb

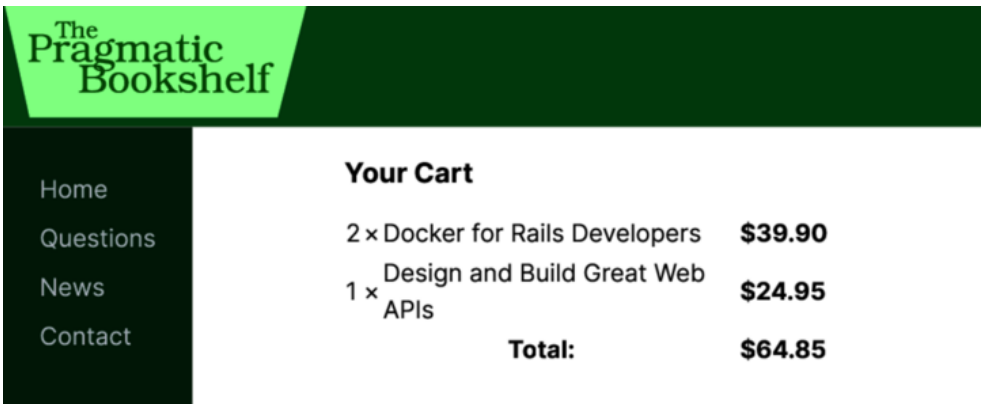

```
  def total_price
    product.price * quantity
  end
```

We implement the `Cart` method using the nifty `Array::sum` method to sum the prices of each item in the collection:

rails80/depot_i/app/models/cart.rb

```
  def total_price
    line_items.sum { |item| item.total_price }
  end
```

The following screenshot shows a nicer-looking cart.

Finally, we update our test cases to match the current output:
