

Let's just wait for the Webby Award nomination.

Changing the Flow

Now that we're displaying the cart in the sidebar, we can change the way that the Add to Cart button works. Rather than display a separate cart page, all it has to do is refresh the main index page.

The change is straightforward. At the end of the `create` action, we redirect the browser back to the index:

rails80/depot_k/app/controllers/line_items_controller.rb

```
    def create
      product = Product.find(params[:product_id])
      @line_item = @cart.add_product(product)

      respond_to do |format|
        if @line_item.save
»         format.html { redirect_to store_index_url }
          format.json { render :show,
            status: :created, location: @line_item }
        else
          format.html { render :new,
            status: :unprocessable_entity }
          format.json { render json: @line_item.errors,
            status: :unprocessable_entity }
        end
      end
    end
```
