At this point, we rerun our tests and see a number of failures:

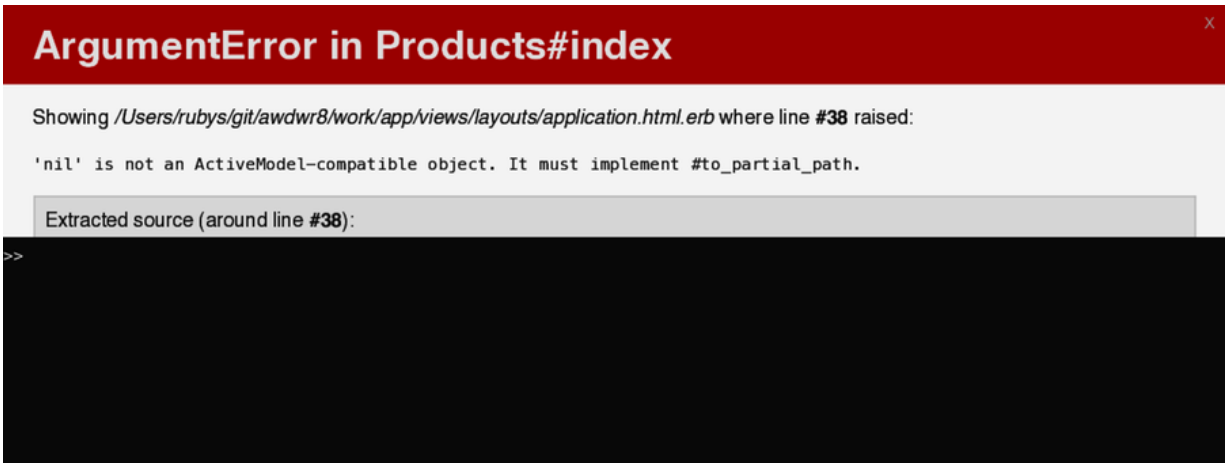

```
$ bin/rails test
Running 30 tests in a single process (parallelization threshold is 50)
Run options: --seed 58541

# Running:

...E

Error:
ProductsControllerTest#test_should_show_product:
ActionView::Template::Error: 'nil' is not an ActiveModel-compatible
object. It must implement :to_partial_path.
app/views/layouts/application.html.erb:25
```

If we try to display the products index by visiting http://localhost:3000/products in the browser, we see the error shown in the screenshot.

This information is helpful. The message identifies the template file that was being processed at the point where the error occurs (app/views/layouts/application.html.erb), the line number where the error occurred, and an excerpt from the template of lines around the error. From this, we see that the expression being evaluated at the point of error is @cart.line_items, and the message produced is 'nil' is not an ActiveModel-compatible object.
