We're not done yet. We haven't tested any of our Hotwire additions, such as what happens when we click the Add to Cart button. Rails provides the help we need to do that too.

We already have a `should create line_item` test, so let's add another one called `should create line_item via turbo-stream`:

rails80/depot_o/test/controllers/line_items_controller_test.rb

```
test "should create line_item via turbo-stream" do
  assert_difference("LineItem.count") do
    post line_items_url, params: { product_id: products(:pragprog).id },
      as: :turbo_stream
  end

  assert_response :success
  assert_match /<tr class="line-item-highlight">/, @response.body
end
```

This test differs in the name of the test, the addition of `as: :turbo_stream`—and in the expected results. Instead of a redirect, we expect a successful response containing a call to replace the HTML for the cart.
