```
    <div class="my-5">
»     <%= form.label :password, 'Password:' %>
»     <%= form.password_field :password, class: "input-field" %>
    </div>

    <div class="my-5">
»     <%= form.label :password_confirmation, 'Confirm:' %>

»     <%= form.password_field :password_confirmation,
»                             id: :user_password_confirmation,
»                             class: "input-field" %>
    </div>

    <div class="inline">
      <%= form.submit class: "w-full sm:w-auto rounded-md px-3.5 py-2.5 bg-
blue-600
      hover:bg-blue-500 text-white inline-block font-medium cursor-pointer" %>
    </div>
  <% end %>
```

Let's try it. Navigate to http://localhost:3000/users/new. For a stunning example of page design, see the following screenshot.

After Create User is clicked, the index is redisplayed with a cheery flash notice. If we look in our database, you'll see that we've stored the user details:

```
depot> sqlite3 -line storage/development.sqlite3 "select * from users"
```
