```
            id = 1
          name = dave
  email_address = dave@example.org
password_digest =
$2a$12$p1HwU98TtNu.j/UBv74e4.ljjpvWdPk4tN6kTkWxp1QVV7UyR73em
    created_at = 2025-04-20 14:43:27.934633
    updated_at = 2025-04-20 14:43:27.934633

            id = 2
          name = sam
  email_address = sam@example.org
password_digest =
$2a$12$UQrQxRNRatkzGpwhnUQ3X.QjUQr57bcCui01wXYMjlosZO0rIzLLK
    created_at = 2025-04-20 14:43:35.232745
    updated_at = 2025-04-20 14:43:35.232745
```

As we've done before, we need to update our tests to reflect the validation and redirection changes we've made. First we update the test for the `create` method:

rails80/depot_r/test/controllers/users_controller_test.rb

```
    test "should create user" do
      assert_difference("User.count") do
»       post users_url, params: { user: {
»         email_address: "sam@example.org",
»         name: "sam",
»         password: "secret",
»         password_confirmation: "secret" } }
      end

»     assert_redirected_to users_url
    end
```

Because the redirect on the `update` method changed too, the `update` test also needs to change:

```
    test "should update user" do
      patch user_url(@user), params: { user: {
        email_address: @user.email_address,
        name: @user.name,
        password: "secret",
```
