Since this view is named layouts/application.html.erb, the English mappings will expand to en.layouts.application. Here's the corresponding locale file:

rails80/depot_t/config/locales/en.yml

```
en:

  layouts:
    application:
      title:       "The Pragmatic Bookshelf"
      home:        "Home"
      questions:   "Questions"
      news:        "News"
      contact:     "Contact"
```

Here it is in Spanish:

rails80/depot_t/config/locales/es.yml

```
es:

  layouts:
    application:
      title:       "Biblioteca de Pragmatic"
      home:        "Inicio"
      questions:   "Preguntas"
      news:        "Noticias"
      contact:     "Contacto"
```

The format is YAML, the same as the one used to configure the databases. YAML consists of indented names and values, where the indentation in this case matches the structure that we created in our names.

To get Rails to recognize new YAML files, the server needs to be restarted.

Navigating to http://localhost:3000/es now will show some translated text, as shown in the following screenshot.
