rails80/depot_t/app/views/orders/_cc.html.erb

```
    <fieldset data-payment-target="additionalFields" data-type="Credit card">
      <div class="my-5">
»       <%= form.label :credit_card_number, t('.cc_number') %>
        <%= form.password_field :credit_card_number, class: "input-field" %>
      </div>

      <div class="my-5">
»       <%= form.label :expiration_date, t('.expiration_date') %>
        <%= form.text_field :expiration_date, class: "input-field",
          size:9, placeholder: "e.g. 03/22" %>
      </div>
    </fieldset>
```

Next, we do the check fields:

rails80/depot_t/app/views/orders/_check.html.erb

```
    <fieldset data-payment-target="additionalFields" data-type="Check">
      <div class="my-5">
»       <%= form.label :routing_number, t('.routing_number') %>
        <%= form.text_field :routing_number, class: "input-field" %>
      </div>

      <div class="my-5">
»       <%= form.label :account_number, t('.account_number') %>
        <%= form.password_field :account_number, class: "input-field" %>
      </div>
    </fieldset>
```

And finally, update the purchase order fields:

rails80/depot_t/app/views/orders/_po.html.erb

```
    <fieldset data-payment-target="additionalFields" data-type="Purchase order">
      <div class="my-5">
»       <%= form.label :po_number, t('.po_number') %>
        <%= form.number_field :po_number, class: "input-field" %>
      </div>
    </fieldset>
```

With those done, here are the corresponding locale definitions:
