```
        else
          format.html { render :new, status: :unprocessable_entity }
          format.json { render json: @order.errors,
            status: :unprocessable_entity }
        end
      end
    end
```

Next, we adjust the test to match:

rails80/depot_u/test/controllers/orders_controller_test.rb

```
    test "should create order" do
      assert_difference("Order.count") do
        post orders_url, params: { order: { address: @order.address,
          email: @order.email, name: @order.name,
          pay_type: @order.pay_type } }
      end

»     assert_redirected_to store_index_url(locale: "en")
    end
```

Finally, we provide the translations:

rails80/depot_u/config/locales/en.yml

```
en:

  thanks:          "Thank you for your order"
```

rails80/depot_u/config/locales/es.yml

```
es:

  thanks:          "Gracias por su pedido"
```

See the cheery message in the screenshot shown.
