```
    # https://api.rubyonrails.org/classes/ActiveRecord/FixtureSet.html

    one:
      name: Dave Thomas
      address: MyText
      email: dave@example.org
      pay_type: Check

» another_one:
»   name: Dave Thomas
»   address: 123 Any St
»   email: dave@example.org
»   pay_type: Check
»   created_at: <%= 2.days.ago %>
»
» other_customer:
»   name: Chris Jones
»   address: 456 Somewhere Ln
»   email: chris@nowhere.net
»   pay_type: Check
    two:
      name: MyString
      address: MyText
      email: MyString
      pay_type: 1
```

Note how we're using ERB inside our fixture. This code is executed when we request a fixture, and we're using it to force an older creation date for one of our orders. By default, Rails sets `created_at` on models it creates from fixtures to the current time. When we ask Rails to create that particular fixture with `orders(:another_one)`, it will execute the code inside the `<%=` and `%>`, effectively setting the `created_at` value to the date as of two days ago.

With these fixtures available, we can write our second test:

rails80/depot_tb/test/mailboxes/support_mailbox_test.rb

```
    require "test_helper"

    class SupportMailboxTest < ActionMailbox::TestCase
```
