a user to a form, showing them a nice flash message, you have to adopt a different strategy when you serve XML. Consider your application architecture carefully before deciding to bundle all your processing into single controllers.

Rails makes it straightforward to develop an application that’s based on resource-based routing. Many claim it greatly simplifies the coding of their applications. However, it isn’t always appropriate. Don’t feel compelled to use it if you can’t find a way of making it work. And you can always mix and match. Some controllers can be resource based, and others can be based on actions. Some controllers can even be resource based with a few extra actions.
