to move this static content onto a separate box or to different locations on the current box. Do this by setting the configuration variable `asset_host`:

```
config.action_controller.asset_host = "http://media.my.url/assets"
```

Although this list of helpers may seem to be comprehensive, Rails provides many more; new helpers are introduced with each release, and a select few are retired or moved off into a plugin where they can be evolved at a different pace than Rails.
