```
»         cart.add_product(book_one).save!
»         cart.add_product(book_two).save!
»       end
»
»       it "has two line items" do
»         expect(cart.line_items.size).to eq(2)
»       end
»       it "has a total price of the two items' price" do
»         expect(cart.total_price).to eq(book_one.price + book_two.price)
»       end
»     end

»     context "adding duplicate products" do
»       before do
»         cart.add_product(book_one).save!
»         cart.add_product(book_one).save!
»       end
»
»       it "has one line item" do
»         expect(cart.line_items.size).to eq(1)
»       end
»       it "has a line item with a quantity of 2" do
»         expect(cart.line_items.first.quantity).to eq(2)
»       end
»       it "has a total price of twice the product's price" do
»         expect(cart.total_price).to eq(book_one.price * 2)
»       end
»     end
    end

  end
```

Running `bin/rails spec`, it should pass:

```
> bin/rails spec
.....

Finished in 0.11007 seconds (files took 1.72 seconds to load)
5 examples, 0 failures
```

A lot of code in this file isn't executing a test, but all the calls to `describe`, `context`, and `it` aren't for naught. Passing `SPEC_OPTS="--format=doc"` to the spec
