Maybe you've been following along and writing the code in this chapter. If so, chances are that the application is still running on your computer. When we start coding our next application in Chapter 6, *Task A: Creating the Application*, we'll get a conflict the first time we run it because it'll also try to use the computer's port 3000 to talk with the browser. Now is a good time to stop the current application by pressing `Ctrl-C` in the window you used to start it. Microsoft Windows users may need to press `Ctrl-Pause/Break` instead.

Now let's move on to an overview of Rails.
