HTML tags from the description.

- Look at the `link_to 'Destroy'` line. See how it has the parameter `data: { turbo_confirm: 'Are you sure?' }`. If you click this link, Rails arranges for your browser to pop up a dialog box asking for confirmation before following the link and deleting the product. (Also, see the sidebar for an inside scoop on this action.)

As far as styling goes:

- We left the notice alone.
- We added `mx-auto` to the `h1` and `table` to center them horizontally on the page. This corresponds to setting the CSS margin to auto, where `x` is the horizontal axis and `y` would be the vertical axis.
- We added classes like `px-2` and `py-3` to add vertical and horizontal padding.
- Most of the rest of the changes are self-explanatory, with names like `text-xl`, `bg-blue-600`, and `hover:underline`.

We loaded some test data into the database, and we rewrote the `index.html.erb` file that displays the listing of products. Now let's bring up a browser and point to http://localhost:3000/products. The resulting product listing might look something like the following screenshot.
