config/database.yml, you must use spaces, not tabs, at the start of each of the data lines, and all the lines for a row must have the same indentation. Be careful as you make changes, because you need to make sure the names of the columns are correct in each entry; a mismatch with the database column names can cause a hard-to-track-down exception.

This data is used in tests. In fact, if you rerun bin/rails test now you'll see a number of errors, including the following error:

```
Error:
ProductsControllerTest#test_should_get_index:
ActionView::Template::Error: The asset "MyString" is not present in
the asset pipeline.
```

The reason for the failure is that we recently added an image_tag to the product index page and Rails can't find an image by the name MyString (remember that image_tag is a Rails helper method that produces an HTML <img> element). Let's correct that error and, while we're here, add some more data to the fixture file with something we can use to test our Product model:

rails7/depot_c/test/fixtures/products.yml

```
# Read about fixtures at
# https://api.rubyonrails.org/classes/ActiveRecord/FixtureSet.html

one:
  title: MyString
  description: MyText
» image_url: lorem.jpg
  price: 9.99

two:
  title: MyString
  description: MyText
» image_url: lorem.jpg
  price: 9.99
