

Although we have reason to be pleased with ourselves, we're not done yet. An important principle of migrations is that each step needs to be reversible, so we implement a `down` too. This method finds line items with a quantity of greater than one; adds new line items for this cart and product, each with a quantity of one; and, finally, deletes the line item:

rails7/depot_g/db/migrate/20221207000005_combine_items_in_cart.rb

```
def down
  # split items with quantity>1 into multiple items
  LineItem.where("quantity>1").each do |line_item|
    # add individual items
    line_item.quantity.times do
      LineItem.create(
        cart_id: line_item.cart_id,
        product_id: line_item.product_id,
        quantity: 1
      )
    end

    # remove original item
    line_item.destroy
  end
end
```

Now, we can just as easily roll back our migration with a single command:

```
depot> bin/rails db:rollback
```
