

We can remove the flash message that's autogenerated when a line item is added:

rails7/depot_i/app/controllers/line_items_controller.rb

```
    def create
      product = Product.find(params[:product_id])
      @line_item = @cart.add_product(product)

      respond_to do |format|
        if @line_item.save
»         format.html { redirect_to cart_url(@line_item.cart) }
          format.json { render :show,
            status: :created, location: @line_item }
        else
          format.html { render :new,
            status: :unprocessable_entity }
          format.json { render json: @line_item.errors,
            status: :unprocessable_entity }
        end
      end
    end
```

Finally, we get around to tidying up the cart display. The -based approach makes it hard to style. A table-based layout would be easier. Replace app/views/carts/_cart.html.erb with the following:

rails7/depot_i/app/views/carts/_cart.html.erb

```
  <div id="<%= dom_id cart %>">
»   <h2 class="font-bold text-lg mb-3">Your Cart</h2>
»
»   <table class="table-auto">
```
