```
      respond_to do |format|
        if @line_item.save
»         format.html { redirect_to store_index_url }
          format.json { render :show,
            status: :created, location: @line_item }
        else
          format.html { render :new,
            status: :unprocessable_entity }
          format.json { render json: @line_item.errors,
            status: :unprocessable_entity }
        end
      end
    end
```

At this point, we rerun our tests and see a number of failures:

```
$ bin/rails test
Running 30 tests in a single process (parallelization threshold is 50)
Run options: --seed 58541

# Running:

...E

Error:
ProductsControllerTest#test_should_show_product:
ActionView::Template::Error: 'nil' is not an ActiveModel-compatible
object. It must implement :to_partial_path.
app/views/layouts/application.html.erb:25
```

If we try to display the products index by visiting http://localhost:3000/products in the browser, we see the error shown in the following screenshot.
