```
    assert_difference('LineItem.count') do
      post line_items_url, params: { product_id: products(:ruby).id },
        as: :turbo_stream
    end

    assert_response :success
    assert_match /<tr class="line-item-highlight">/, @response.body
  end
```

This test differs in the name of the test, the addition of `as: :turbo_stream`—and in the expected results. Instead of a redirect, we expect a successful response containing a call to replace the HTML for the cart.
