rails7/depot_o/test/fixtures/orders.yml

```
# Read about fixtures at
# https://api.rubyonrails.org/classes/ActiveRecord/FixtureSet.html

one:
  name: Dave Thomas
  address: MyText
  email: dave@example.org
  pay_type: Check

two:
  name: MyString
  address: MyText
  email: MyString
  pay_type: 1
```

Furthermore, for an order to be created, a line item needs to be in the cart, so we need to modify the line items test fixture too:

rails7/depot_o/test/fixtures/line_items.yml

```
# Read about fixtures at
# https://api.rubyonrails.org/classes/ActiveRecord/FixtureSet.html

one:
  product: two
  cart: one
  price: 1

two:
  product: ruby
  order: one
  price: 1
```

Note that if you didn't choose to do the optional exercises in *Playtime*, you need to modify all of the references to products and carts at this time and *not* add `price` to the line items.

Feel free to make other changes, but only the first is currently used in the functional tests. For these tests to pass, we'll need to implement the model.
