

But did it work? Let's look in the database, using the Rails command `dbconsole`, which tells Rails to open an interactive shell to whatever database we have configured.

```
depot> bin/rails dbconsole
SQLite version 3.36.0 2021-06-18 18:58:49
Enter ".help" for instructions
sqlite> .mode line
sqlite> select * from orders;
                  id = 1
                name = Dave Thomas
             address = 123 Main St
               email = customer@example.com
            pay_type = 0
          created_at = 2022-01-12 16:41:35.897275
          updated_at = 2022-01-12 16:41:48.065263
sqlite> select * from line_items;
                  id = 10
          product_id = 3
             cart_id =
          created_at = 2022-01-12 16:41:46.548932
          updated_at = 2022-01-12 16:41:48.065780
            quantity = 1
               price = 19.95
            order_id = 1
sqlite> .quit
```

Although what you see will differ on details such as version numbers and dates (and `price` will be present only if you completed the exercises defined in *Playtime*), you should see a single order and one or more line items that match your selections.

Our customer is enthusiastic about our progress, but after playing with the new checkout feature for a few minutes, she has a question: how does a user enter
