```
          <ul class="text-gray-300 leading-8">
»           <li><a href="/"><%= t('.home') %></a></li>
»           <li><a href="/questions"><%= t('.questions') %></a></li>
»           <li><a href="/news"><%= t('.news') %></a></li>
»           <li><a href="/contact"><%= t('.contact') %></a></li>
          </ul>

          <% if session[:user_id] %>
            <hr class="my-2">

            <ul class="text-gray-300 leading-8">
              <li><%= link_to 'Orders',   orders_path   %></li>
              <li><%= link_to 'Products', products_path %></li>
              <li><%= link_to 'Users',    users_path    %></li>
              <li><%= button_to 'Logout', logout_path, method: :delete %></li>
            </ul>
          <% end %>
        </nav>

        <main class="container mx-auto mt-4 px-5 flex">
          <%= yield %>
        </main>
      </section>
    </body>
  </html>
```

Since this view is named layouts/application.html.erb, the English mappings will expand to en.layouts.application. Here's the corresponding locale file:

rails7/depot_t/config/locales/en.yml

```
en:

  layouts:
    application:
      title:       "The Pragmatic Bookshelf"
      home:        "Home"
      questions:   "Questions"
      news:        "News"
      contact:     "Contact"
```

Here it is in Spanish:

rails7/depot_t/config/locales/es.yml
