See the following screenshot for the completed form.

All looks good until we click the Realizar Pedido button prematurely and see the results shown in the following screenshot. The error messages that Active Record produces can also be translated; what we need to do is supply the translations:

rails7/depot_t/config/locales/es.yml

```
es:

  activerecord:
    errors:
      messages:
        inclusion: "no est&aacute; incluido en la lista"
        blank:     "no puede quedar en blanco"
  errors:
    template:
      body:        "Hay problemas con los siguientes campos:"
      header:
        one:       "1 error ha impedido que este %{model} se guarde"
        other:     "%{count} errores han impedido que este %{model} se guarde"
```

Although you can create these with many trips to Google Translate, the Rails i18n gem's GitHub repo contains a lot of translations for common strings in many languages.[73]
