

That's better, but the names of the model and the attributes bleed through the interface. This is OK in English, because the names we picked work for English. We need to provide translations for each model. This, too, goes into the YAML file:

rails7/depot_u/config/locales/es.yml

```
es:

  activerecord:
    models:
      order:       "pedido"
    attributes:
      order:
        address:   "Direcci&oacute;n"
        name:      "Nombre"
        email:     "E-mail"
        pay_type:  "Forma de pago"
```

Note that there's no need to provide English equivalents for this, because those messages are built into Rails.

We're pleased to see the model and attribute names translated in the following screenshot; we fill out the form, we submit the order, and we get a "Thank you for your order" message.
