We need to update the flash messages and add the locale to the `store_index_url`:

rails7/depot_u/app/controllers/orders_controller.rb

```
      def create
        @order = Order.new(order_params)
        @order.add_line_items_from_cart(@cart)

        respond_to do |format|
          if @order.save
            Cart.destroy(session[:cart_id])
            session[:cart_id] = nil
            ChargeOrderJob.perform_later(@order,pay_type_params.to_h)
»           format.html { redirect_to store_index_url(locale: I18n.locale),
»             notice: I18n.t('.thanks') }
            format.json { render :show, status: :created,
              location: @order }
          else
            format.html { render :new, status: :unprocessable_entity }
            format.json { render json: @order.errors,
              status: :unprocessable_entity }
          end
        end
      end
```

Next, we adjust the test to match:

rails7/depot_u/test/controllers/orders_controller_test.rb

```
      test "should create order" do
        assert_difference("Order.count") do
          post orders_url, params: { order: { address: @order.address,
            email: @order.email, name: @order.name,
            pay_type: @order.pay_type } }
        end

»       assert_redirected_to store_index_url(locale: 'en')
      end
```

Finally, we provide the translations:

rails7/depot_u/config/locales/en.yml

```
    en:
```
