```
»           <dt>PayType</dt>
»           <dd><%= support_request.order.pay_type %></dd>
»
»           <dt>Line Items</dt>
»           <dd>
»             <ul>
»               <% support_request.order.line_items.each do |line_item| %>
»                 <li>
»                   <%= line_item.product.title %>
»                   (<%= line_item.product.price %>)
»                 </li>
»               <% end %>
»             </ul>
»           </dd>
»         </dl>
»       <% else %>
»         <h3 class="notice">No associated order</h3>
»       <% end %>
»       <hr>
»     </li>
»   <% end %>
» </ul>
```

Restart your server, create a few orders and, using the Rails conductor we saw earlier, create a few support tickets. Be sure at least one of them is from an email you used to create an order. When you've done that, navigate to http://localhost:3000/admin and log in. Once you've done *that*, navigate to http://localhost:3000/support_requests and you should see the UI you just created with your support requests rendered:
