

The `lib` directory is also a good place to put code that's shared among models, views, or controllers. Maybe you need a library that validates a credit card number's checksum, that performs some financial calculation, or that works out the date of Easter. Anything that isn't directly a model, view, or controller should be slotted into `lib`.

Don't feel that you have to stick a bunch of files directly into the `lib` directory. Feel free to create subdirectories in which you group related functionality under `lib`. For example, on the Pragmatic Programmer site, the code that generates receipts, customs documentation for shipping, and other PDF-formatted
