Not shown in this example are `hidden_field` and `password_field`. A hidden field is not displayed at all, but the value is passed back to the server. This may be useful as an alternative to storing transient data in sessions, enabling data from one request to be passed onto the next. Password fields are displayed, but the text entered in them is obscured.

This is more than an adequate starter set for most needs. Should you find that you have additional needs, you're likely to find a helper or gem is already available for you. A good place to start is with the Rails Guides.[109]

Meanwhile, let's explore how the data form's submit is processed.
