When Things Go Wrong

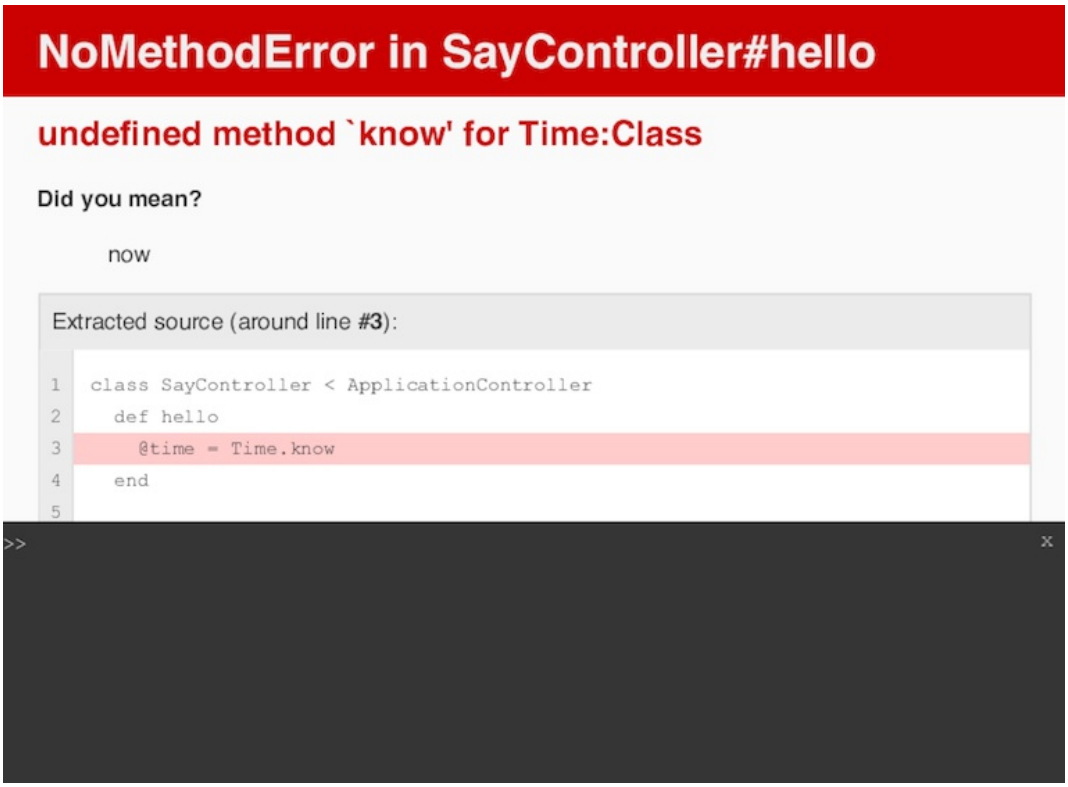

Let’s start by introducing a typo in the source code—one that perhaps is introduced by a misfiring autocorrect function in your favorite editor:

rails7/demo5/app/controllers/say_controller.rb

```
  class SayController < ApplicationController
    def hello
»     @time = Time.know
    end

    def goodbye
    end
  end
```

Refresh the following page in your browser: http://localhost:3000/say/hello. You should see something like the following screenshot.

For security reasons, the web console is configured to only be shown when accessed from the same machine that the web server is running on. If you’re
