chances are that the application is still running on your computer. When we start coding our next application in Chapter 6, *Task A: Creating the Application*, we'll get a conflict the first time we run it because it'll also try to use the computer's port 3000 to talk with the browser. Now is a good time to stop the current application by pressing `Ctrl-C` in the window you used to start it. Microsoft Windows users may need to press `Ctrl-Pause/Break` instead.

Now let's move on to an overview of Rails.
