```
  end

  private
  def set_product
    @product = Product.find(params[:id])
  end

  def product_params
    params.require(:product).permit(:name, :price)
  end
end
```

And remove from the assets/stylesheets/scaffolds.scss file, this piece of code:

```
a {
  color: #000;

  &:visited {
    color: #666;
  }

  &:hover {
    color: #fff;
    background-color: #000;
  }
}
```

Step 9. Add products links to navigation bar

After adding products, we can add products links to the navigation bar. Add this piece of code to app/views/layouts/application.html.erb:

```
...21
<div id="navbar" class="navbar-collapse collapse">
  <ul class="nav navbar-nav">
    <li class="dropdown">
      <a href="#" class="dropdown-toggle" data-
toggle="dropdown" role="button" aria-haspopup="true" aria-
expanded="false">Products <span class="caret"></span></a>
      <ul class="dropdown-menu">
        <li><%= link_to "List", products_path %></li>
        <li><%= link_to "New", new_product_path %></li>
      </ul>
    </li>
```
