```
class ApplicationController <
ActionController::Base
  helper_method :current_user
  def current_user
    if session[:user_id]
      @current_user ||=
User.find(session[:user_id])
    else
      @current_user = nil
    end
  end
end
```

To put it into use we change the content of `app/views/home/index.html.erb`:

```
<% if current_user %>
  Logged in as <%= current_user.email %>.
  <%= link_to “Log Out”, logout_path %>
<% else %>
  <%= link_to “Sign Up”, signup_path %> or
  <%= link_to “Log In”, login_path %>
<% end %>
<p id=”notice”><%= notice %></p>
<h1>Example</h1>
<p>Lorem ipsum …</p>
```

The End

And here is the screencast where I log in with my account and log out afterwards:
