In this step, replace content of your views/layouts/application.html.erb file with this:

```
<!DOCTYPE html>
<html>
<head>
  <title>Shop</title>
  <%= stylesheet_link_tag   'application', media: 'all',
'data-turbolinks-track' => true %>
  <%= javascript_include_tag 'application', 'data-turbolinks-
track' => true %>
  <%= csrf_meta_tags %>
</head>
<body>
  <nav class="navbar navbar-inverse navbar-top navbar-fixed-
top">
    <div class="container-fluid">
      <div class="container">
        <div class="navbar-header">
       <button type="button" class="navbar-toggle collapsed"
data-toggle="collapse" data-target="#navbar" aria-
expanded="false" aria-controls="navbar">
         <span class="sr-only">Toggle navigation</span>
         <span class="icon-bar"></span>
         <span class="icon-bar"></span>
         <span class="icon-bar"></span>
       </button>
       <a class="navbar-brand" href="/">Rails Tutorial</a>
     </div>
      </div>
    </div>
  </nav>
  <div id="main-container" class="container">
    <%= yield %>
  </div>
</body>
</html>
```

Step 4. Add flash message

Now add two methods(bootstrap_classs and flash_messages) to app/assets/stylesheets/ApplicationHelper.rb which will be used to display messages.

application_helper.rb
