_product.json.jbuilder
index.json.jbuilder
show.json.jbuilder

Step 8. Add bootstrap to product files

Now, let's modify files in app/views/products folder.

form.html.erb
edit.html.erb
new.html.erb
show.html.erb

index.html.erb:

```
<%= flash_messages %>
<h2>Products List</h2>
<div class="product-block">
  <table class="table table-striped table-bordered table-
hover">
    <thead>
      <tr>
        <th class="col-md-2">Name</th>
     <th class="col-md-2">Price</th>
     <th class="col-md-4">Options</th>
      </tr>
    </thead>
    <tbody>
      <% @products.each do |product| %>
        <tr>
           <td class="col-md-2"><%= product.name %></td>
           <td class="col-md-2">$<%= product.price %></td>
           <td class="col-md-4">
            <%= link_to 'Show', product_path(product), class:
"btn btn-info" %>
            <%= link_to 'Edit', edit_product_path(product),
class: "btn  btn-warning" %>
            <%= link_to 'Destroy', product_path(product),
method: :delete, data: { confirm: 'Are you sure?' }, class:
"btn btn-danger" %>
           </td>
     </tr>
      <% end %>
    </tbody>
  </table>
```
