```
  Pry.commands.alias_command 's', 'step'
  Pry.commands.alias_command 'n', 'next'
  Pry.commands.alias_command 'f', 'finish'
end
```

Debugging with `pry-byebug`

- Start debug session

```
# somewhere in your code
binding.pry
```

- Navigation

```
# step into the next line/method
pry> step
# or step multiple times
pry> step 3

# step over to the next line/method
pry> next
# or
pry> next 2

# exit current stack frame
pry> finish

# move the stack frame up/down
pry> up
pry> down
pry> up 3
pry> down 4

# continue to the next breakpoint
pry> continue
# or
pry> exit
```
